SHARF

Space Habitat Analog
Research Facility

Space Habitat Analog Research Facility - From concept to orbit

The Space Habitat Analog Research Facility (SHARF) is an ESA Ground-Based Facility (GBF) that provides controlled environments that replicate the abiotic conditions of space habitats. It offers the infrastructure needed to develop, evaluate, and improve systems for biological production and resource recovery.

Rapid development and testing with us!

Whether you want to test ...

...test novel
amazing vehicles...

...grow tomatoes
on Moon and Mars...

...test incredible rovers
drones and robots...

...come and say hi!

Innovating in materials,
processes and testing

Thank you!
